

Details do count

Interesting? If you're hungry...
Sooner or later, we all are. So,
Olsonet presents:

The Kitchen
view (fragments)

 olso net Communications

: power cycles

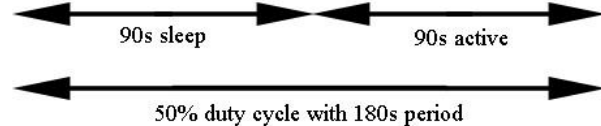

Master:
 PAR_CYC_M_SYNC 60
 PAR_CYC_M_REST 120

SET PAR_CYC_CTRL(enable,net)

Active <=> LPM0,RxON,TxON

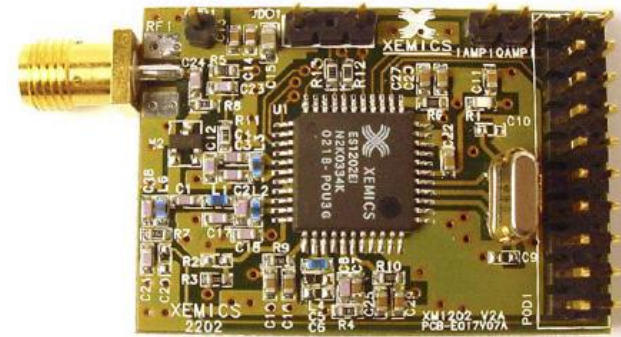

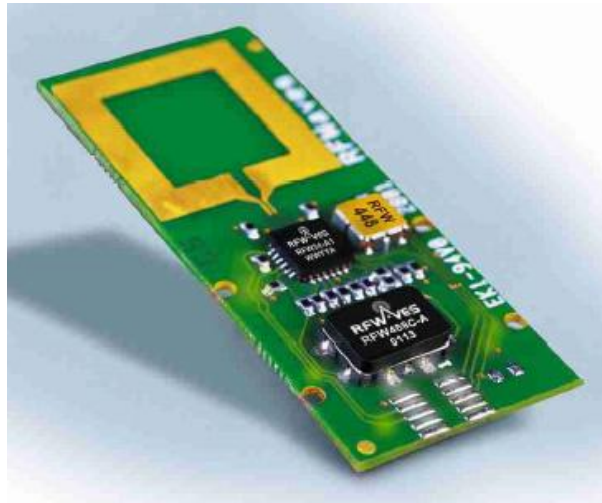

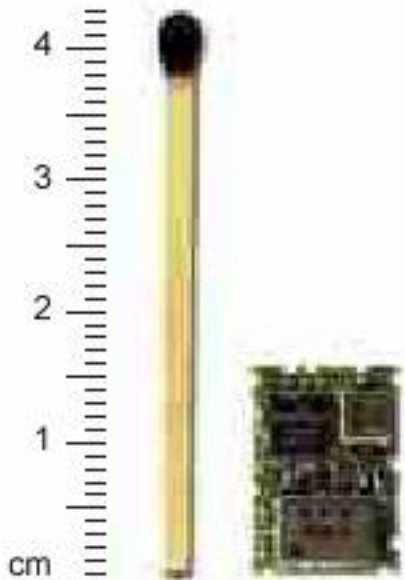

Fieldnode:
 PAR_CYC_SLEEP 90

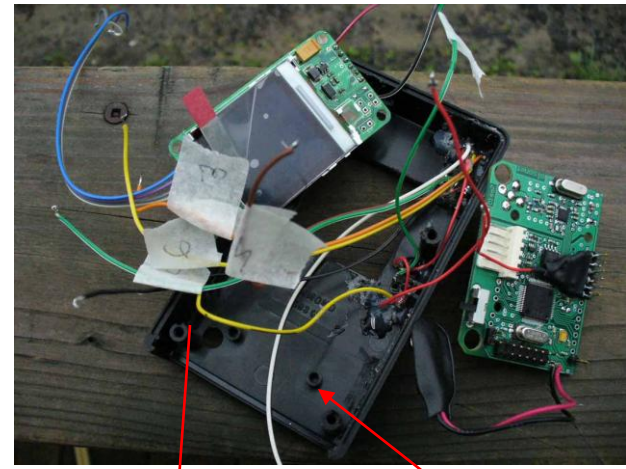

It is not that easy to make it easy

: which RF?

Size? Range? Power budget? Bandwidth? Reliability? Cost? Interoperability?

: which box?

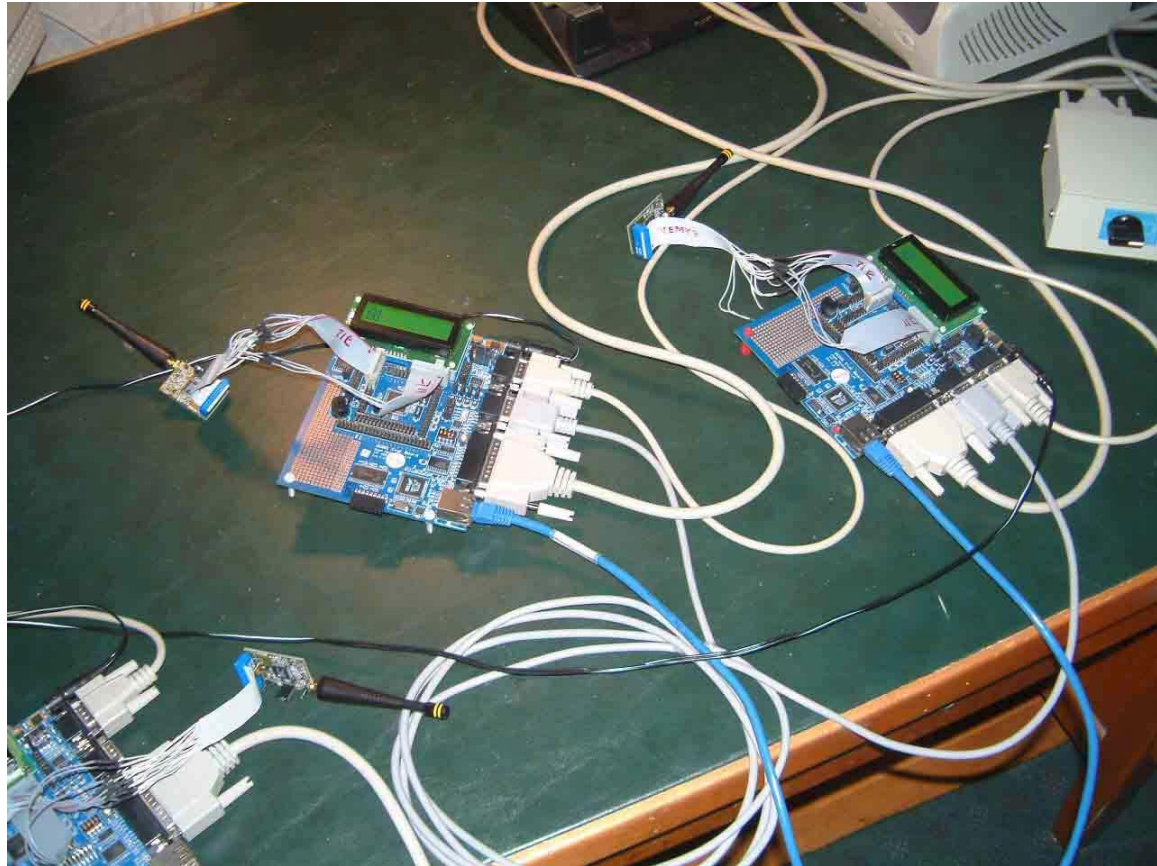

?

: *where* matters

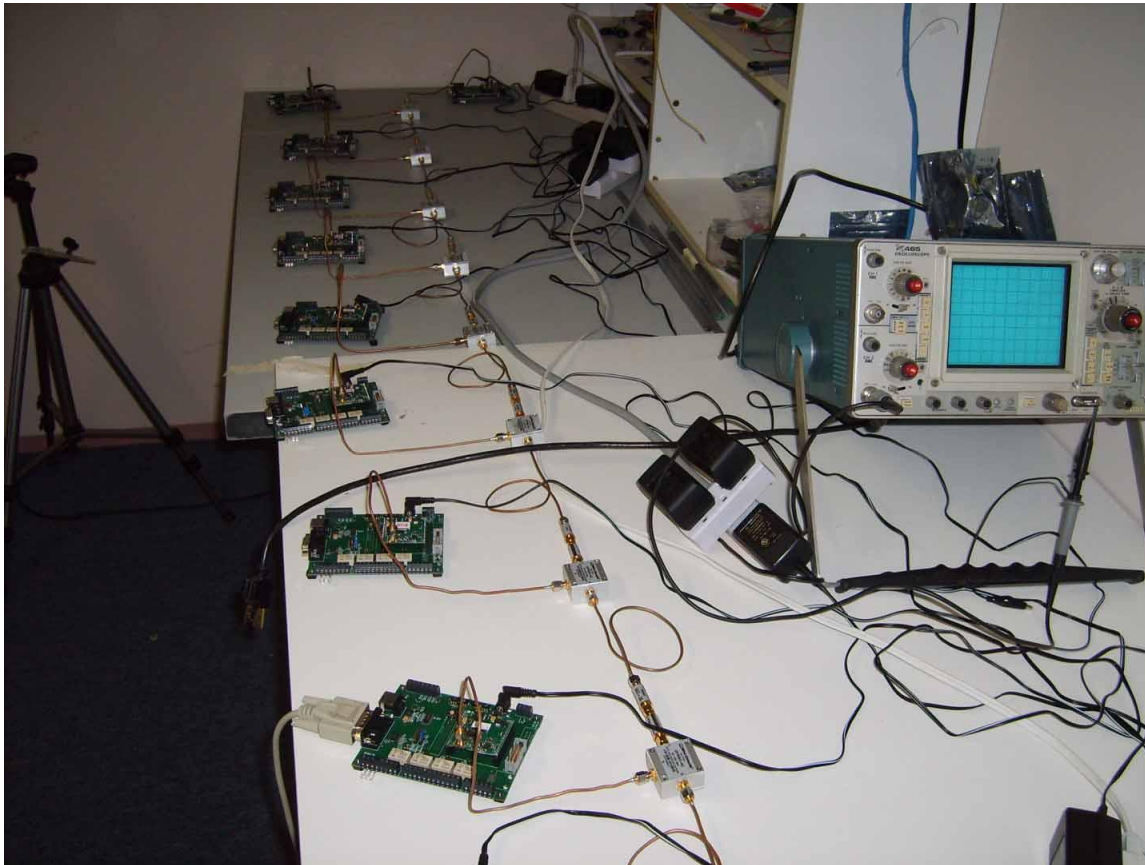

...just about metering, and this seems well defined...

: which everything?

Processor? Memory? RF? Interfaces? Size? Cost?

: does it really multi-hop?

Now, to serious stuff

To hardware or not to hardware...

- **The VUEE experience**
